

Flood Preparedness

How to prepare for a flood

- Download local flood warning apps (see below)
- Keep all flood claim related receipts and records in a water proof bag and away from water exposure
- Take photos of your home or business as it is now
- Raise your personal belongings
- Review your evacuation routes with your family, employees and for your animals
- Have a list of important phone numbers and sandbag locations
- Teach everyone how and when to shut off gas, electricity and water lines
- Keep household chemicals above flood levels to avoid contamination
- Review your Flood Insurance Declaration Page
- Do not turn on sump pumps inside the structure until after flood waters start to recede to prevent structural damage
- Take photos before throwing away damaged belongings if you have flood content coverage.
